## Full-Stack Software Engineer

ytraderoearning@gmail.com · +998 93 554 90 44 · github.com/SunnatilloDev

### SUMMARY

I'm a full-stack engineer who likes owning products from the database all the way to the deployed UI. In more than two years I've built and scaled live platforms used by thousands of people, mostly in education and marketplaces. One of them, an AI IELTS feedback tool, I built entirely on my own. I lean on AI coding agents like Claude Code and Cursor to get from an idea to something running in production quickly.

### SELECTED PROJECTS

A few of the builds I'm most proud of.

#### 1 Founder & Full-Stack Dev · Feb 2026 – Present Writify.uz

AI-powered IELTS writing feedback & progress tracking · Solo built

- Built the whole product solo, front to back. Hit **250 users and 300+ essays graded** in three months.
- Now scaling to learning centres, with an **AI agent per student** and per teacher to track mistakes and shape lessons. First centre onboarding now.

#### 2 Full-Stack Developer · Jun 2026 – Present Durbin.uz

All-in-one platform for private schools · 10-person team

- Full-stack work on a single system combining CRM, HR, finance and marketing with an LLM layer, used by **dozens of schools and 2,000+ people**.

#### 3 Backend Developer · Nov – Dec 2025 Satzio.uz

Digital SAT testing platform · 2-person team

- Owned the backend for a full digital-SAT experience, including the **anti-cheat system** and scoring engine. Shipped in two months, now **400 students**.

#### 4 Frontend Developer · JoyTop Oct – Nov 2025 (joy.com.uz)

Super-app marketplace — housing, goods & local services

- Built the **admin panel** (analytics, content management and reporting) for a marketplace spanning housing, goods and local services.

### SKILLS

#### FRONTEND

React Next.js (App Router) TypeScript Vite  
Chakra UI Tailwind SCSS

#### BACKEND

Node.js NestJS Express REST APIs  
Webhooks RBAC / Auth

#### DATABASES & ORM

PostgreSQL MongoDB Prisma Mongoose  
Firebase

#### AI & LLM

Claude Code Cursor AI Agents Claude API  
OpenAI Gemini

#### MAPS & 3D

Leaflet MapLibre GL CesiumJS Turf.js  
Three.js

#### DEVOPS & INTEGRATIONS

Ubuntu VPS Nginx PM2 Vercel SSL  
Payme / Click Telegram Bots

### EDUCATION

#### High School Diploma

2026

Self-taught software engineer. Started coding at a local learning centre, then learned backend development on my own.
